

# Retail Solutions

## Manage change programmes, fixtures and fit-outs faster, better and cheaper

Whether you are managing new store fit-outs, refurbishments, fixtures, visuals or other network-wide design changes, ePIN solutions can help you increase control, streamline operations and reduce administration costs.

### Design-change roll outs

ePIN Programme Manager dramatically reduces the time and cost of managing network-wide design change programmes, where local teams must adhere to common standards and processes.

- Enable team members and partners to access design information quickly & easily
- Control design and cost submissions, and other approvals online
- Monitor and report on programme progress and at the click of a button

### Fixtures, design standards and point-of-sale libraries

ePIN Information Manager helps you control and communicate the information your local teams need to procure and install fixtures, access design standards and keep point-of-sale material up-to-date.

- Control documents and manage approval processes on-line
- Distribute information quickly and easily
- Keep local teams and partners abreast of the information that they need
- Track who has downloaded what information when

### Store fit-out

ePIN Project Office provides complete control of store refurbishment or new-build programmes, enabling you to mitigate project risk, increase control and reduce project administration effort.

- Manage key processes, including design, procurement and change management
- Monitor costs and handle invoice approvals on-line
- Share project information among your team quickly and easily
- Monitor and report on progress against key project milestones

*We wanted an effective, easy-to-use solution that could handle a change programme spanning 44 countries 'out of the box'. ePIN delivered."*

*Kieran O' Dwyer  
Toyota Europe*

ePIN solutions are flexible, functionally rich and easy to use. No in-house administration is necessary and each implementation is tailored to suit your precise project or operational needs.

*Project Support Manager, Debenhams*

**About ePIN**

ePIN designs, manages and hosts internet based collaboration, asset and project management systems. Lead by a management team with extensive industry experience, ePIN delivers innovative, robust and easy-to-use solutions that are tailored to their clients' individual needs and can be up and running in days.

Since 1998, ePIN has successfully deployed systems across a range of industry sectors. Leading organisations such as British Land, ProLogis, Debenhams, Hermes, Nissan and Toyota, use ePIN solutions to mitigate risk, reduce cost and maximise returns.

*"The implementation of an extranet site has saved Nissan a substantial amount of time and money and enables real time communication of concept design or application changes."*

*Martyn Fisher*

*Director, Turner & Townsend*
